### 2) Comprehension:

1.

**b) To maintain the health of our planet and future generations**

2. **b) Solar, wind, and hydropower**

3. **a) It**

**Why should societies adopt green technologies?**

Societies should adopt green technologies because they offer sustainable alternatives to fossil fuels, reducing carbon footprints and pollution. This helps mitigate climate change and promotes a more sustainable future.

**How do education and awareness help environmental conservation?**

Education and awareness help by informing people about the environment's importance and the threats it faces. Informed individuals are more likely to take protective actions, and community involvement empowers contributions to local conservation efforts.
